# MATERIAL TYPES

## SMMS

Meltblown katmanı sayesinde terletme yapmayan bu materyal sıvı geçişine olanak tanımayan su itici dört katmandan oluşur ve kullanıcıya maksimum rahatlık sağlar.

Due to the meltblown layer, this material consists of four water-repellent layers that do not allow liquid passage and provide maximum comfort to the user.

## SSMMS

Meltblown katmanı sayesinde terletme yapmayan bu materyal sıvı geçişine olanak tanımayan su itici beş katmandan oluşur ve kullanıcıya maksimum rahatlık sağlar.

Due to the meltblown layer, this material consists of five water-repellent layers that do not allow liquid passage and provide maximum comfort to the user.

## VİSKOZ + PE FİLM + EMİCİ MATERYAL

### VISCOSE + PE FILM + ABSORBENT MATERIAL

Uzun süreli cerrahi operasyon kullanımına uygun, üst katman %100 viskoz emici medikal nonwoven, orta katman sıvı geçişine izin vermeyen, bakteri bariyerli PE film ve alt katmanı emici medikal nonwovenden üretilen materyaldir.

Suitable for long-term surgical operation, this material consists of an upper layer with 100% viscose absorbent medical nonwoven, a middle layer that has a bacterial barrier PE film which does not allow fluid permeability, and a lower layer with a material manufactured from absorbent medical nonwoven.

## VİSKOZ + PE FİLM

### VISCOSE + PE FILM

Çeşitli cerrahi operasyonlarda kullanmaya yönelik bu materyal, üst katmanı %100 viskoz emici medikal nonwoven, alt katmanı sıvı geçişine izin vermeyen bakteri bariyerli PE film malzemedir.

This material is used in various surgical operations and it consists of a 100% viscose absorbent medical nonwoven upper layer and the lower layer is made out of a bacterial barrier PE film material that does not allow fluid permeability.

## EMİCİ NONWOVEN + PE FİLM

### ABSORBENT NONWOVEN + PE FILM

Üst katmanı emici medikal nonwoven ve alt katmanı sıvı geçişine izin vermeyen yumuşak dokuya sahip materyalden yapılmış bu malzeme, çeşitli cerrahi operasyonlarda kullanılır.

This material, whose upper layer is made of absorbent medical nonwoven and the lower layer is made of soft tissue material that does not allow fluid passage, can be used in various surgical operations.

# MALZEME TÜRLERİ

## STERİLİZASYON BOHÇASI

### STERILIZATION WRAP

Non-woven yapısı sayesinde içindeki ürünlerin steril kalmasına katkıda bulunur.

Thanks to its non-woven structure, sterilization wrap contributes to the sterility of the products inside.

## MEDİKAL BANT

### MEDICAL ADHESIVE TAPE

Anti-alerjik yapıya sahip olan bu bantlar cerrahi operasyonlarda kullanılan cerrahi örtüleri operasyon bölgesine veya belirlenmiş alana sabitlemek için kullanılır.

Medical adhesive tapes, which have an anti-allergic structure, are used to fix the surgical drapes used in surgical operations to the operation area or the designated area.

## SPUNBOND

Sıvı direnci olmayan bu materyal, non-steril halde pazara sunulan ziyaretçi önlüğü, hasta önlüğü ve sedye örtüsü üretiminde kullanılır.

This material, which does not have liquid resistance, is used in the production of visitor gown, patient gowns and stretcher covers that are presented to the market in non-sterile form.

## HAVLU

### TOWEL

Yüksek emiciliği ve hava bırakmayan yapısı sayesinde yüksek kullanım rahatlığı sağlar, çeşitli cerrahi setlere dahildir.

Due to its high absorbency and air-tight structure, it provides great ease of use and is included in various surgical sets.

## POŞ

### POUCH

Çeşitli setlere dahil olan poş, sağlam yapısı sayesinde sağlık personelinin operasyon sırasında sıvılara maruz kalma olasılığını düşürür.

The pouch, which is included in various sets, reduces the possibility of healthcare personnel to be exposed to liquids during the operation thanks to its robust structure.
